This game's presentation is simply breathtaking. The amazing visuals and the way they are synchronized to the soundtrack is nothing short of brilliant.

It's a shame the controls, namely the button presses that appear in the top-right corner, cause undue frustration and really take you out of the game. The developers really should have evaluated this when porting this game over to Steam, as what may be practical on a touch screen is highly impractical here. You have to do awkward combinations of button presses at a very fast rate that is, at times, seemingly impossible.

I'd give this a neutral review if that were possible, but as it stands this is a reluctant thumbs up based on the aforementioned control issues. If the developer had addressed this... well then this title would not only be a hearty thumbs up, it would be deemed an absolute must play.
